

Code blocks

DocsForge supports rich code blocks with syntax highlighting, titles, line numbers, and more.

Basic code blocks

Use triple backticks with a language identifier:

```
``` python
def hello(name):
 print(f"Hello, {name}!")
```
```

```
def hello(name):
    print(f"Hello, {name}!")
```

Supported languages

DocsForge supports 300+ languages via Pygments, including:

- python, py
- javascript, js
- typescript, ts
- bash, sh, shell
- yaml, yml
- json
- html
- css
- markdown, md
- dockerfile
- sql
- rust
- go
- java
- c, cpp

- `csharp, cs`
- `ruby, rb`
- `php`
- `lua`
- `r`
- `julia`
- `kotlin`
- `swift`
- `dart`

Code block with title

```
``` python title="hello.py"
def hello(name):
 print(f"Hello, {name}!")
```
```

hello.py

```
def hello(name):
    print(f"Hello, {name}!")
```

Line numbers

```
``` python linenums="1"
def hello(name):
 print(f"Hello, {name}!")
 return True
```
```

```
1  def hello(name):
2      print(f"Hello, {name}!")
3      return True
```

Highlighting lines

```
``` python hl_lines="2 3"
def hello(name):
 message = f"Hello, {name}!"
 print(message)
```

```
 return message
...
```

```
def hello(name):
 message = f"Hello, {name}!"
 print(message)
 return message
```

## Diff blocks

Show additions and deletions:

```
``` diff
def hello(name):
-    print("Hello!")
+    print(f"Hello, {name}!")
    return True
```
```

```
def hello(name):
- print("Hello!")
+ print(f"Hello, {name}!")
 return True
```

## Console blocks

Show command output:

```
``` console
$ docsforge build
INFO    - Cleaning site directory
INFO    - Building documentation to directory: site
INFO    - Documentation built in 2.34 seconds
```
```

```
$ docsforge build
INFO - Cleaning site directory
INFO - Building documentation to directory: site
INFO - Documentation built in 2.34 seconds
```

## No copy button

Disable the copy button for a specific block:

```
python
```

Or globally disable in config:

```
theme:
 features:
 # Don't include - content.code.copy
```
