

Reference

Complete syntax reference for all DocsForge Markdown extensions and components.

Overview

DocsForge extends standard Markdown with powerful syntax for technical documentation. All extensions are enabled by default in the starter template.

Admonitions

Note, warning, tip, danger, and custom callout boxes.

Annotations

Add comments and explanations to code blocks.

Code blocks

Syntax highlighting, line numbers, titles, copy button, and more.

Content tabs

Group related content with tabbed interfaces.

Data tables

Sortable, styled tables with alignment and formatting.

Diagrams

Mermaid.js flowcharts, sequence diagrams, and more.

Formatting

Highlight, subscript, superscript, and inline formatting.

Icons & Emojis

8,000+ icons and 3,000+ emojis via `:material-heart:` syntax.

Images

Captions, alignment, lazy loading, and figure markup.

Lists

Ordered, unordered, nested, task lists, and definition lists.

Tooltips

Abbreviations, definitions, and hover tooltips.

Markdown extensions enabled by default

```
markdown_extensions:  
  - abbr  
  - admonition  
  - attr_list  
  - def_list  
  - footnotes  
  - md_in_html  
  - toc:  
    permalink: true  
  - pymdownx.arithmatex  
  - pymdownx.betterem  
  - pymdownx.caret  
  - pymdownx.details  
  - pymdownx.emoji
```

```
- pymdownx.highlight
- pymdownx.inlinehilite
- pymdownx.keys
- pymdownx.magiclink
- pymdownx.mark
- pymdownx.smartsymbols
- pymdownx.superfences
- pymdownx.tabbed
- pymdownx.tasklist
- pymdownx.tilde
```

Standard Markdown

DocsForge supports all standard Markdown syntax:

- Headings (# to #####)
- Paragraphs and line breaks
- Bold (**text**) and italic (*text*)
- Strikethrough (~~text~~)
- Links ([text](url)) and images (![alt](url))
- Blockquotes (> quote)
- Inline code (`code`) and code blocks
- Horizontal rules (---)
- Ordered and unordered lists
