

Setup

DocsForge's setup guides help you customize every aspect of your documentation site. All configuration happens in `docsforge.yml`.

Overview

The following guides cover the most common customization scenarios:

Changing the colors

Customize primary, accent, and background colors. Configure light and dark mode palettes.

Changing the fonts

Use Google Fonts or custom font files for text and code.

Changing the language

Set the site language, configure search stemming, and RTL support.

Setting up navigation

Tabs, sections, indexes, footer links, and table of contents.

Setting up site search

Configure search behavior, separators, and result presentation.

Setting up site analytics

Add Plausible or Google Analytics to track page views.

Setting up social cards

Configure Open Graph and Twitter Card meta tags for rich link previews.

Building an optimized site

Enable HTML minification, asset compression, and build optimization.

Adding a git repository

Link to your source repo with "Edit this page" buttons.

Configuration file

All customization is done in `docsforge.yml`. DocsForge loads all plugins and Markdown extensions automatically — you only configure what you want to customize.

docsforge.yml

```
site_name: My Project
site_url: https://example.com/docs/
site_author: Your Name
site_description: Documentation for My Project

repo_name: username/repo
repo_url: https://github.com/username/repo

copyright: Copyright &copy; 2025 Your Name

theme:
  name: material
  features:
    - navigation.tabs
    - navigation.sections
    - navigation.top
    - search.highlight
    - search.suggest
    - content.code.copy
  palette:
    - media: "(prefers-color-scheme: light)"
      scheme: default
      primary: teal
```

```
    accent: teal
    toggle:
      icon: material/brightness-7
      name: Switch to dark mode
  - media: "(prefers-color-scheme: dark)"
    scheme: slate
    primary: black
    accent: teal
    toggle:
      icon: material/brightness-4
      name: Switch to light mode
font:
  text: Roboto
  code: Roboto Mono
```

Next steps

Pick a guide above to customize a specific aspect of your site. Each guide includes copy-paste-ready configuration examples.
